**OEM****MIRICLE Camera Core****KB Bayonet Lens Fitting**

## For Immediate Release: April 2005

**Thermoteknix launch the smallest 384 x 288 infrared camera in the world.**

Thermoteknix has graduated from its role as major electronics and software supplier to third party infrared camera manufacturers, with the launch of its own MIRICLE® infrared camera range. According to Managing Director, Dr. Richard Salisbury "Thermoteknix MIRICLE cameras deliver outstanding image performance, resolution and flexibility across the full spectrum of thermal applications. Our MIRICLE 110 K cameras offer 44% more image resolution than industry standard 320 x 240 detector cameras for better quality imaging and remote sensing with flexible configurations from ultra compact, sub-miniature, ruggedized aerospace cameras to modular OEM high performance cores. Based on our miniature 1.6 inch cube core, our Miricle infrared cameras sets a new level for thermal imaging today. "

Thermoteknix' long history of innovation and recognized leading role in digital image processing electronics and infrared application software, support and extend the MIRICLE cameras with the fullest range of turnkey and development solutions to suit customers world-wide. MIRICLE cameras incorporate the latest hi-performance uncooled microbolometer FPA's, powerful embedded software, Quikchange™ AutoID sensed lenses, and many more features for outstanding performance in cost effective packages that are unmatched today. A range of MIRICLE imaging models have been created to satisfy end users, system integrators and OEM camera builders alike, as we target the surveillance, R & D, Aerospace, Military and On-line process applications with our stand alone and PC based MIRICLE cameras.

Thermoteknix Systems Ltd. was established in 1982 and has been a major developer and supplier of infrared systems for applications from aerospace to industrial process monitoring. Its headquarters are in Cambridge, England and the company has representation throughout the world. In 1998 Thermoteknix was awarded The Queen's Award for Export Achievement, the UK's highest commercial recognition of export success to satisfy its global customer base.
